- 2013- Present*    Ecology expert advisor, Store Norske Leksikon, Norway
- 2012- 2015*        Post-doctoral research fellow, Norwegian University of Science and Technology, Norway
- 2007- 2012*        PhD research fellow, Norwegian University of Science and Technology, Norway
- 2006*                Researcher, University of Helsinki, Finland
- 2006*                MSc, University of Oslo, Norway

Research interests:

I aim to increase general understanding of how organisms adapt to environmental change, variability and unpredictability. I am also interested in the interactions of the different types of adaptations including behavioural adaptations like insurance strategies, life-history adaptations like plasticity and long term evolutionary adaptations like bet-hedging.
