

José Enrique Figueroa-López

GENERAL INFORMATION

Education

- Ph.D. in Applied Mathematics* Spring 2004
Georgia Institute of Technology, Atlanta, GA
Thesis: Nonparametric estimation of Lévy processes with a view towards mathematical finance
Advisor: Christian Houdré.
- M.S. in Quantitative and Computational Finance* Spring 2002
Georgia Institute of Technology, Atlanta, GA
- M.S. in Statistics* Spring 1998
CIMAT-Universidad de Guanajuato, Guanajuato, México
Thesis: Construction of second-order self-similar processes.
Advisor: Victor Pérez-Abreu.
- Bachelor in Applied Mathematics* Spring 1995
Universidad Autónoma Metropolitana, México City, México.
Minor: Computer Science

Professional Experience

- Associate Professor* (with tenure) Jul 2015 - present
Department of Mathematics
Washington University in St. Louis
- Associate Professor* (with tenure) Aug 2012 - Jun 2015
Associate Director, Computational Finance Program
Department of Statistics
Purdue University, West Lafayette, IN
- Assistant Professor* Aug 2007 - July 2012
Department of Statistics and Department of Mathematics (Courtesy)
Purdue University, West Lafayette, IN
- Postdoctoral Fellow and Visiting Assistant Professor* Jul 2006 - Aug 2007
Center for research in financial mathematics and statistics
University of California, Santa Barbara, CA.
- Research Assistant Professor* Aug 2004 - May 2006
Department of Mathematics, Purdue University, West Lafayette, IN.
- Graduate Teaching Assistant* Aug 1998 - May 2003
Georgia Institute of Technology, Atlanta, GA

Awards and Honors

- Associate Editor, SIAM Journal on Financial Mathematics* 2017-2020
- NSF Regular Research Grant* (DMS-Statistics) 2016-2019
Summer salary, travel, and graduate student support.
- NSF CAREER Grant* (DMS-Statistics) 2012-2017

Summer salary, travel, and graduate and undergraduate student support <i>Purdue University Faculty Scholar</i>	2014-2015
Purdue University's recognition for "outstanding accomplishments by faculty mid-way through their academic career".	
<i>Purdue Research Foundation Grant</i>	Aug 2012-Jul 2013
Graduate student support	
<i>College of Science Team Award</i>	2012
For his outstanding team work in the Computational Finance Program at Purdue	
<i>Purdue Research Foundation Grant.</i>	June 2011-May 2012
Graduate student support	
<i>Department of Statistics Outstanding Assistant Professor Teaching Award</i>	2011
<i>Associate Editor, Electronic Journal of Statistics</i>	2010-2012
<i>NSF Regular Research Grant (DMS-Statistics)</i>	2009-2012
Summer salary and travel.	
<i>Summer Faculty Grant from the Purdue Research Foundation</i>	June-August 2008
<i>Tower Award for high GPA during Ph.D. studies.</i>	April 2004
Georgia Institute of Technology	
<i>Distinguished Alumni of the M.S. in Statistics</i>	September 2003
Centro de Investigación en Matemáticas (CIMAT), Gto., México	
<i>Honor Medal for Best GPA of the 95-mathematics class</i>	Fall 1995
Universidad Autónoma Metropolitana	
<i>First Place in the Fourth Mexican Mathematical Olympiads</i>	1990

RESEARCH INTEREST

Mathematical Finance:

(i) Option Pricing and Hedging in Lévy-based and general jump-diffusion models. (ii) Portfolio optimization and stochastic control. (iii) Limit Order Book modeling and optimal order placement and execution.

Statistics:

(i) High-Frequency statistical methods for stochastic processes. (ii) Nonparametric estimation and model selection methods.

Probability:

(i) Limit theorems, construction, and simulation of stochastic processes. (ii) Lévy and other related jump processes. (iii) Short-time asymptotics and their applications thereof.

PUBLICATIONS

Refereed Publications

1. J.A. Chávez-Casillas and J.E. Figueroa-López. A one-level limit order book model with memory and variable spread. Accepted in *Stochastic Processes and their Applications*, 33 pages, forthcoming in 2017.
2. J.E. Figueroa-López and S. Ólafsson. Short-time asymptotics for the implied volatility skew under a stochastic volatility model with Lévy jumps. *Finance and Stochastics* 20(4), 973-1020, 2016.
3. J.E. Figueroa-López, R. Gong, and C. Houdré. High-order short-time expansions for ATM option prices of exponential Lévy models. *Mathematical Finance*, 26(3), 516-557, 2016.
4. J.E. Figueroa-López and S. Ólafsson. Short-time expansions for close-to-the-money options under a stochastic volatility model with Lévy jumps. *Finance and Stochastics* 20(1), 219-265, 2016.

Books and book chapters

1. Jump-diffusion models driven by Lévy processes.
An invited chapter to appear in the Handbook of Computational Finance. Jin-Chuan Duan, James E. Gentle, and Wolfgang Härdle(eds). Springer, 2012.
2. M. Breen, G. Chikhladze, J.E. Figueroa-López, Y. Gershon, Y. Muliadi, and I. Predergast. Modeling the economics of differentiated durable-goods markets. IMA Preprints 1886, July 2002 series.

3. Construcción de Procesos Autosimilares de Variancia Finita (Construction of self-similar processes with finite variance), Advanced text series of the Mexican Mathematical Society, Mexico 2000. 215 Pages.

Submitted

1. J.E. Figueroa-López and C. LI. Optimal Kernel Estimation of Spot Volatility of Stochastic Differential Equations. Submitted, 2017.
2. J.E. Figueroa-López and K. Lee. Estimation of a noisy subordinated Brownian Motion via two-scale power variations. 33 pages. Submitted, 2016.
3. J.E. Figueroa-López, R. Gong, and M. Lorig. Short-Time Expansions for Call Options on Leveraged ETFs under exponential Lévy models with local volatility. Submitted, 2016.
4. J.E. Figueroa-López and S. Ólafsson. Change-point detection for Lévy processes. Submitted, 2016.
5. J.E. Figueroa-López and Y. Luo. Small-time expansions for state-dependent local jump-diffusion models with infinite jump activity. 35 pages. Submitted, 2016.
6. J.E. Figueroa-López and J. Nisen. Second-order properties of thresholded realized power variations of FJA additive processes. 25 pages. Submitted, 2016.
7. J.E. Figueroa-López, R. Gong, and C. Houdré. Third-order short-time expansions for close-to-the-money option prices under the CGMY model. 26 pages. Submitted, 2015.

GRANT ACTIVITY

Current

1. A New Approach Toward Optimal and Adaptive Nonparametric Methods for High-Frequency Data (PI: J.E. Figueroa-López), NSF-DMS-Statistics. Project Period: 2016-2019. Role: Sole PI.
2. CAREER: Bridging high-frequency data analysis and continuous-time features of Lévy models (PI: J.E. Figueroa-López), NSF-DMS-Statistics. Project Period: 2012-2017. Role: Sole PI.

Past

1. Nonparametric estimation of financial jump-diffusion models via random thresholding (Sole PI: Figueroa-López), Purdue Research Foundation. Project Period: 2012-2013. Grant for graduate student support.
2. Nonparametric methods for jump processes under microstructure noise (Sole PI: J.E. Figueroa-López), NSF-DMS-Statistics. Project Period: 2009-2012.
3. Estimation methods for jump-diffusion models (Sole PI: Figueroa-López), Purdue Research Foundation. Project Period: 2011-2012. Role: Sole PI. Grant for graduate student support.

4. Nonparametric estimation methods for financial models driven by Lévy processes (Sole PI: J.E. Figueroa-López), Purdue Research Foundation. Project Period: Jul/2008 - Aug/2008.

ADVISING

Graduated Ph.D. students

Name	Subject	University & Department	grad.	Taken Position
Jonathan Chávez-Casillas	Stochastic modeling of limit order books	Purdue, Mathematics	Aug 2015	Postdoc at the University of Calgary
Yankeng Luo	Small-time expansions for local jump-diffusion models	Purdue, Mathematics	Aug 2015	Instructor at VCU
Jeffrey Nisen	Statistical estimation of jump-diffusion models via optimal thresholding	Purdue, Statistics	Aug 2013	Quant at Barclays, NY
Sveinn Ólafsson	Applications of short-time asymptotic methods to option pricing and change point detection for Lévy models	Purdue, Statistics	Aug 2015	Postdoc at University of California, Santa Barbara

Current Ph.D. students

Name	Subject	University & Department	Exp. grad.
Luis García German	Approximation method for the distributions of Lévy processes	Washington University, Mathematics	Aug 2018
Cheng Li	Nonparametric estimation methods for spot volatility estimation	Purdue, Statistics	Aug 2017
Hyoeyun Lee	Optimal Allocation Problem under stochastic Limit Order Book model	Purdue, Statistics	Aug 2017
Qi Wang	Statistics Inference for Jump-Diffusion Models	Washington University, Mathematics	Aug 2018

Undergraduate and Master Students at Washington University

Name	Subject	Degree	Period
Yantong Li	State of the art stochastic models for limit order book	B.A in Mathematics	2015-2016
Weixuan Gao	Spot Volatility Estimation of Itô Semimartingales using Delta Sequences	M.A. in Statistics	2015-2016
Yiyao Luo	Limit Order Book Modeling	M.A. in Statistics	2016-2017
Zach Virgilio	Limit Order Book Data Analysis	B.A. in Mathematics	2016-2017
Jiachen Wang	Actuarial Science Topic	M.A. in Statistics	2016-2017
Enpeng Yuan	Optimal shortfall risk minimization	B.A. in Mathematics	2016-2017
Ying Zhuang	Jump Detection Methods	M.A. in Statistics	2016-2017

TALKS AND PRESENTATIONS

Recent invited conference and external seminar talks

1. **Main Speaker** at the 12th German Probability and Statistics Days, Bochum, Germany, Mar. 1, 2016. Title: *Optimal Kernel Estimation of Spot Volatility*.
2. Informs. Philadelphia Nov. 1, 2015. Title: *Optimally Thresholded Realized Power Variations for Stochastic Volatility Models with Jumps*.
3. Special Session on Stochastic Analysis with applications to Quantitative Finance. AMS Sectional Meeting at Loyola University in Chicago, Illinois, October 3-4, 2015. Title: *Small-time expansions for state-dependent local jump-diffusion models with infinite jump activity*.
4. 60th World Statistics Congress. Rio de Janeiro, Brasil, July 26-31, 2015. Title: *Optimally Thresholded Realized Power Variations for Stochastic Volatility Models with Jumps*.
5. Special Session on High-Frequency Problems. Central Spring AMS Sectional Meeting. Michigan State University, East Lansing, MI March 14-15, 2015. Title: *Optimally Thresholded Realized Power Variations for Stochastic Volatility Models with Jumps*.
6. SIAM Conference on Financial Mathematics & Engineering, Chicago, Nov. 13-15, 2014. Title: *Optimally Thresholded Realized Power Variations for Lévy Jump Diffusion Models*.
7. Seminar in stochastic analysis, math finance and PDE, Department of Mathematics, Rutgers University, Nov. 3, 2014. Title: *Power Utility Maximization in Hidden Regime-Switching Markets with Default Risk*.
8. Financial Statistics Conference. Stevanovich Center, The University of Chicago, Sept. 27, 2014. Title: *Optimally Thresholded Realized Power Variations for Levy Jump Diffusion Models*.
9. Conference on Statistics, Jump Processes, and Malliavin Calculus: Recent Applications. University of Barcelona, Barcelona, Spain, Jun. 25-27, 2014. Title: *Short-time expansions for close-to-the-money options under a Lévy jump model with stochastic volatility*.
10. 7th International Conference in High Dimensional Probability. Institut d'Etudes Scientifiques de Cargse. Nice University, Nice, France, May 26-30, 2014. Title: *Optimally Thresholded Realized Power Variations for Lévy Jump Diffusion Models*.
11. **Plenary speaker** at the XI Symposium of Probability and Stochastic Processes. Center of Research in Mathematics (CIMAT), Guanajuato, Mexico, Nov. 18-22, 2013. Title: *Advances on the short-time behavior of option prices under stable-like small jumps*
12. **Plenary speaker** at the 2nd Workshop on Risk Analysis in Economics and Finance. University of Guanajuato, Gto. Mexico, May. 15-17, 2013. Title: *Applications of short-time asymptotics to the statistical estimation and option pricing of Levy-driven model*.
13. Graduate Seminar Series. Department of Mathematics and Statistics, University of Missouri at Kansas City, April 2013. Title: *Optimal Thresholding for Lévy jump diffusion models*.

14. Quantitative Finance Seminar. Department of Industrial Engineering, Seoul National University, Seoul, Korea, August, 2012. Title: *Small-time asymptotics of stopped Lévy bridges and simulation schemes with controlled bias.*
15. Quantitative Finance Seminar. Department of Financial Engineering, Ajou University, Seoul, Korea, August, 2012. Title: *Small-time asymptotics of stopped Lévy bridges and simulation schemes with controlled bias.*
16. SIAM Conference on Financial Mathematics and Engineering, Minneapolis, July 9-11, 2012. Title: *Small-time Expansions for Stochastic Volatility Models with Lévy Jumps.*
17. CLAPEM 2012: XII Latin American Congress of Probability and Mathematical Statistics, Via del Mar, Chile, March 26-30, 2012. Title: *Small-time asymptotics of stopped Lévy bridges and simulation schemes with controlled bias.*
18. Informs 2011. Annual Meeting, Charlotte, NC, November 13-16, 2011. Title: *Dynamic Portfolio Optimization with a Defaultable Security and Regime Switching.*
19. Sixth International Conference in High Dimensional Probability, Banff International Research Station for Mathematical Innovation and Discovery, Canada, October 13-16, 2011. Title: *Small-time expansions for local jump-diffusion models with infinite jump activity.*
20. 7th International Congress on Industrial and Applied Mathematics - ICIAM 2011, Vancouver, BC, Canada, 2011. Title: *Near-expiration option prices in Lévy financial models.*
21. Conference on Statistics and Modeling for Complex Data, Ecolé des Ponts Paris-Tech, Paris, France, 2011. Title: *Central limit theorems for the nonparametric estimation of time-changed Lévy model.*
22. Risk Seminar, Statistics Department, Columbia University, 2011. Title: *Near-expiration behavior of implied volatility for exponential Lévy models.*
23. Financial Mathematics Seminar, the Stevanovich Center for Financial Mathematics, The University of Chicago, 2011. Title: *Near-expiration behavior of implied volatility for exponential Lévy models.*
24. SIAM-SEAS Minisymposium in Mathematical Finance, University of North Carolina at Charlotte, NC, 2011. Title: *Near-expiration behavior of implied volatility for exponential Lévy models.*
25. Bachelier Financial Seminar, Paris, France, 2010. Title: *Small-time asymptotics for Lévy processes and their application to estimation and option pricing.*
26. Mathematics seminar, Nice University, Nice, France, 2010. Title: *Small-time asymptotics for Lévy processes and their application to estimation and option pricing.*
27. Seminar on Mathematical Finance and Financial Engineering, Georgia Tech, GA, 2010. Title: *Small-time statistical behavior of Lévy processes and its application to the estimation and pricing of Lévy-based financial models.*

28. Statistics Colloquium, Indiana University, IN, 2010. Title: *High-Frequency based estimation of exponential Lévy Models.*
29. The Fifth International Workshop in Applied Probability. Univeridad Carlos III de Madrid, Spain, 2010. Title: *Optimal portfolios and admissible strategies in a Lévy-driven markets.*
30. The Pan-American Advanced Studies Institute. Centro de Investigación en Matemáticas (CIMAT), Guanajuato, Mexico, 2010. Title: Mini course on *Statistical Methods for Financial Models driven by Lévy Processes.*
31. Applied Mathematics Colloquia, Illinois Institute of Technology, IL, 2009. Title: *Nonparametric estimation of time-changed Lévy models.*
32. Mathematical Finance and Probability Seminar, Rutgers University, NJ, 2009. Title: *Non-parametric estimation of time-changed Lévy models.*
33. Stochastic Analysis at Purdue '09 Workshop. Purdue University, IN, 2009. Title: *Optimal portfolios and admissible strategies in a Lévy market.*
34. Workshop on Infinitely Divisible Processes. Centro de Investigación en Matemáticas (CIMAT), Guanajuato, México, 2009. Title: *Non-parametric methods for Lévy-based financial models.*
35. Fifth International Conference in High Dimensional Probability. Centre International de Recontres Mathématiques (C.I.R.M.), Luminy, France, 2008. Title: *Model selection for Lévy processes based on discrete-sampling.*
36. The third Erich L. Lehmann symposium, Rice University, TX, 2007. Title: *Non-parametric estimation for some models driven by Lévy processes.*
37. Kent-Purdue Mini Symposium on Financial Mathematics, Kent University, OH, 2007. Title: *State-dependent utility maximization in Lévy markets.*

Contributed conference talks

1. Spring AMS Central Section Meeting, Special Session on Stochastic Processes with Applications to Mathematical Finance, University of Iowa, IA, 2011. Title: *Near-expiration behavior of implied volatility for exponential Lévy models.*
2. Conference on Modeling High Frequency Data in Finance II, Stevens Institute of Technology, NJ, 2010. Title: *Parametric Estimation of Geometric Lévy Models under High-Frequency Data.*
3. Spring AMS Southeastern Section Meeting, Special Session on Financial mathematics and statistics, University of Kentucky, KY, 2010. Title: *Nonparametric estimation for a Time-changed Lévy Model.*
4. Spring AMS Central Section Meeting, Special Session on Financial Mathematics, Bloomington, IN, 2008. Title: *State-dependent utility maximization in markets driven by additive Lévy processes.*

UNIVERSITY AND DEPARTMENT SERVICE

Washington University

F2016 - S2017	Member, Statistics Committee
F2016 - S2017	Member, Graduate Committee
F2015 - S2016	Member, Statistics Committee
F2015 - S2016	Member, Graduate Committee
F2015	Created new Course, Math 461: Time Series Analysis (with Todd Kuffner);
F2015	Organizer of the Statistics and Probability Seminar

Purdue University

F2012 – S2015	University Senate Committee
F2014 - S2015	Chair, Search Committee in Actuarial Science
F2014 - S2015	Member, Probability Qualifier Committee
S2014	Co-Chair, the Computational Finance Seminar
F2013 - S2014	Member, Graduate Program Committee
S2013	Co-Chair, Computational Finance Seminar
F2012 - S2013	Member, Graduate Program Committee
F2012 - S2013	Member, Graduate Admission Committee
F2012 - S2013	Member, Probability Qualifier Committee
S2012	Chair of the Computational Finance Seminar
F2011 - S2012	Member, Graduate Program Committee
F2011 - S2012	Member, Graduate Admission Committee
S2011	Chair of the Computational Finance Seminar
F2011 - S2012	Member, Probability Qualifier Committee
F2010 - S2011	Member, Graduate Admission Committee
S2010	Co-Chair of the Computational Finance Seminar
F2010 - S2011	Member, Probability Qualifier Committee
S2009	Co-Chair of the Computational Finance Seminar
F2009 - S2010	Member, Graduate Admission Committee
F2008 - S2009	Member, Graduate Admission Committee
S2008	Chair of the Computational Finance Seminar
F2007 - S2008	Member, Probability Qualifier Committee

PROFESSIONAL SERVICE

1. Associate Editor, SIAM Journal on Financial Mathematics (2017-2020).
2. Co-Organizer: 8th International Conference in High Dimensional Probability. Casa Matemática Oaxaca (BIRF-affiliated mathematics research centre), Oaxaca, México, May 28-June 2, 2017.
3. Organizer: Special Session on Asymptotic Methods in Financial Models with Jumps at the SIAM Conference on Financial Mathematics & Engineering, Nov. 13-15, Chicago, Illinois USA, 2014.

4. Organizer: Special Session on Statistical Inference for Stochastic Processes within the framework of the XI Symposium of Probability and Stochastic Processes, CIMAT, Guanajuato, Mexico, 2013.
5. Served in the NSF grant review panel for Statistics during Spring 2014.
6. Served as Associate Editor of the *Electronic Journal of Statistics* (2010-2012).
7. Jointly with Professors Levine and Viens, organized a special session on Quantitative Finance at the 8th International Symposium on Statistics held at Purdue University, June 20-24, 2012.
8. Jointly with I. Florescu and M. Mariani, organized the international conference on Modeling High Frequency Data in Finance III held at Stevens Institute of Technology, NJ, July 2010.
9. Organized a special session on “Stochastic Processes with Applications to Mathematical Finance” at the Sectional Meeting of the American Mathematical Society in Iowa City, IA, March 18-20, 2011.
10. Organized a special session on “Financial Mathematics and Statistics” at the Sectional Meeting of the American Mathematical Society in University of Kentucky, March 27-28, 2010.
11. Reviews scientific manuscripts for several journals and refereed conference proceeding including:
 - Annals of Finance
 - Annals of Statistics
 - Applied Mathematical Finance
 - Applied Mathematics and Optimization
 - The Canadian Journal of Statistics
 - Finance and Stochastics
 - Journal of the American Statistical Association
 - Journal of Applied Probability
 - Journal of Statistical Planning and Inference
 - Mathematical Finance
 - Market Microstructure & Liquidity
 - Statistics and Probability Letters
 - Stochastic Processes and their Applications
 - SIAM journal on Control and Optimization
 - SIAM journal on Financial Mathematics
 - Stochastics and Dynamics
 - Probability Theory and Related Fields
 - Proceedings of the third Erich Lehman Symposium
 - Proceedings of the Fourth International Conference in High Dimensional Probability
 - Quantitative Finance
