POSTDOCTORAL POSITION AVAILABLE

One postdoctoral position is available for a highly motivated researcher to participate in a project focusing on applications of synthetic and systems biology approaches to a unicellular cyanobacterium to dissect the metabolic processes in this photosynthetic organism. The appointment will be in the research group of Himadri Pakrasi (http://pages.wustl.edu/photo.synth.bio) at Washington University in St. Louis. Applicants should have (1) Experimental Experience in Microbial Molecular Biology and/or Photosynthesis, and (2) Experience in Computational Analysis of Genome-scale data.

Applicants should email a CV and contact information for three references to Himadri Pakrasi (mailto:Pakrasi@wustl.edu). Please include as email subject line: Pakrasilab Postdoc Position 2016.
